## Annexure 1

**Salwan Public School, Mayur Vihar**  
**Class: III, Session: 2026–2027**  
**Integrated Project 1**

### Project Title: Mission Super Health!

**Project Goal:** To help students understand the importance of a balanced diet by exploring it through language, art, math, physical activity, and environmental science.

#### 1. EVS & Art (Environmental Studies): The Foundation

**Concept:** Understanding the three main food groups: Energy-Giving (Carbs/Fats), Body-Building (Proteins), and Protective (Vitamins/Minerals).

**Activity: "My Paper Plate Meal"** \* Students learn what a balanced diet looks like.

- They take a real paper plate and draw lines to divide it into the correct portions (this links directly to the Math activity below).
- They draw or paste pictures of food items in the correct sections to create a perfectly balanced meal.

#### 2. Mathematics: The Math of Meals

**Concept:** The Healthy Class Circle Graph

**Activity:**

- The teacher asks the class: "What is your favourite protective food (fruit)?"
- Students collect the data using tally marks and interpret the circle graph made in EVS.

#### 3. English: Show & Tell

**Concept:** Speaking skills, vocabulary building, and confidence.

**Activity: My Super Snack**

- Students bring one healthy snack item from home (e.g., an apple, a handful of almonds, a boiled egg, or a carrot).
- They stand in front of the class and speak 05 lines about it.

#### 4. Hindi: Samvad Lekhan (Dialogue Writing)

**Concept:** Conversational writing, expressing thoughts in Hindi, and understanding healthy choices.

**Activity: "सेहत की बात" (Talk on Health)**

#### 5. Sports / Physical Education: The Energy Burner (House Meeting Period)

**Activity: The "Nutrient Relay Race"**

**Setup:** Place three large buckets or hula hoops at the end of the field labelled: **ENERGY, BODY-BUILDING, and PROTECTIVE.**

**Game:** Divide the class into teams. Place a pile of flashcards (or plastic toys) of different food items at the starting line.

- On the whistle, the first student picks up a food card (e.g., an image of an egg), runs to the buckets, drops it into the correct bucket ("Body-Building"), and runs back to tag the next player.
- This tests their physical agility and their quick-thinking EVS knowledge!
